1909.

[Cd. 4489.] *Price* 1*s*.

110586

NOTE.

The Customs Commission of the French Chamber of Deputies have been engaged for some time past in considering the question of the necessity of revising the French Customs Tariff and have recently issued their Report, in which recommendations are made for the amendment of certain sections of the Tariff. The proposals have yet to be dealt with by the French Legislature, and may be substantially altered as the result of further consideration. It has, however, been thought desirable to prepare, as early as possible, for the information of British traders, a translation of the proposals in their present preliminary form. In the translation appended those portions of the Tariff in which no alteration is proposed are also included with a view to show the complete Tariff as it would be if the proposals were adopted, and the present rates of duty are added for comparison. The produce and manufactures of the United Kingdom are subject to the rates of duty shown in the "Minimum" column of the present Tariff. In those cases in which no "Minimum" rate is indicated products of all countries are alike subject to the duties shown in the "General" Tariff.

COMMERCIAL DEPARTMENT,
BOARD OF TRADE,
January, 1909.

* Not including the internal taxes.

† Wines of a strength of from 12 to 15 degrees shall, for every tenth of a degree, be liable to a Customs duty equal to one-tenth of the consumption tax on alcohol. Wines of a strength exceeding 15 degrees shall, for any fraction of degree, be liable to duty calculated on the immediately higher degree. When the difference between the declaration and the result of the analysis effected by the Customs does not exceed five-tenths of a degree, no proceedings will be taken against the declarant, and the duties shall be collected on the total degrees and fractions of degree ascertained by the Customs.

‡ Products of which alcohol is a component part are, in addition to the Customs duties, subject to the internal tax on the alcohol used, according to the regulations determined upon by the Advisory Committee of Arts and Manufactures.

§ Provided that the importation of such mineral waters has been authorized.

(*a*) As wine in casks.

(*b*) Including the surtax representing the manufacturing tax levied on French beer. Importers are obliged to declare the weight and volume of the consignment, and to produce the original invoices indicating the contents of the receptacles.

* All oils which do not contain more than 90 per cent. of illuminating matter and which, in the condition they are imported, are not fit to burn in ordinary lamps, shall be considered as crude.

In calculating the 90 per cent. centesimal fractions shall be ignored.

Mineral oil containing not more than 30 per cent. of illuminating matter shall be considered as lubricating oil.

A public administrative regulation, issued with the advice of the Advisory Committee of Arts and Manufactures, will prescribe the conditions under which this percentage shall be established.

Should the declarants, not being satisfied with the test made in the Customs laboratories, claim a legal appraisement, such appraisement shall be effected by chemists entered on the general list prescribed by Art. 9 of the Law of January 11, 1892, and their decisions shall be rendered in accordance with Art. 4 of the Law of May 7, 1881.

† Not including the manufacturing tax on oils entering to be refined.

‡ Notwithstanding Art. 24 of the Law dated May 16, 1863, the duties on crude petroleum and on heavy oils and residues are to be assessed on the net weight.

§ The duty leviable by weight on crude petroleum may, on the application of the importers, be converted into a duty per hectolitre under the Minimum Tariff. Said duty shall be at the rate of frs. 7·20 per hectolitre.

‡ The present tariff omits the words "and gilt wares."

‖ The present tariff omits all words after "fitted," and substitutes the words "but without jewelling."

§ (1) Separate plates or false plates forming part of complete movements or escapement bearers, are taxed as complete movements and escapement bearers, and classed under No. 498.

(2) All movements, escapement bearers, separate plates or false plates from which have been removed the pieces which show whether they have been jewelled or not, are considered as finished escapements, and taxed as lever escapements.

(3) All movements, escapement bearers, separate plates or false plates in which the two holes for the balance and escapement wheels have been jewelled, are considered as cylinder escapements.

501 *ter*	With cases of non-precious material	15 00	2 50†	15 00	2 50†

‡ *Note continued from preceding page.*]

(4) All movements, escapement bearers, separate plates or false plates in which the three holes for the balance, lever and escapement wheels have been jewelled, are considered as lever escapements.

(5) Foreign makers must, in future, affix on the movement of every watch imported into France, as near the barrel as possible and in a visible manner the letter M for a watch cased in common metal, A for a watch cased in silver, and O for a watch cased in gold.

(6) Watch movements bearing the letter M cannot be fitted in a gold or silver case except after payment of the supplementary duty established for gold or silver watches, and after affixing, near such letter M, as proof of payment of the supplementary duty, a special stamp which differs according to the nature of the watch case (gold or silver).

The above rule must be observed for the fitting in a gold case of a movement bearing the letter A.

(7) The Officials, who, at present, are charged with affixing stamps which guarantee the standard of gold and silver articles, shall be entrusted with collecting the supplementary duty, and affixing at the same time the special stamp. They shall in addition satisfy themselves that every movement of a gold or silver watch on which has been affixed one of the letters exacted by paragraph 5, bears the letter corresponding to the nature of the metal composing the watch case or, in contrary cases, the special stamp proving the payment of the supplementary duty.

(8) All infractions of the present dispositions shall subject the offender to the penalties provided for in the law for guaranteeing the standard of gold and silver articles.

* The present tariff omits the words "without a spring in the spring box."

† Cases [of common materials] furnished with ornaments of gold or silver are dutiable as cases of gold or silver. However, cases in which the *ongleltes*, hinge-joints or crowns are of gold, gilt or plated, are regarded as silver cases; and cases in which the *carrure*, *rehaut*, rim, pendant, crown, ring, *ongleltes*, hinge-joints, a small shield, a cipher, initials or decorative ornament are gilt, silvered or plated are regarded as cases of non-precious material.

Cases of silver partially gilt are regarded as silver cases. Silver cases entirely gilt are to be treated as silver cases if they bear on the inside the engraved inscription : gilt silver. Cases of non-precious material entirely gilt or silvered are to be treated as cases of non-precious material if they bear on the inside the engraved inscription : gilt metal or silvered metal.

Watches with cases containing struck or stamped bottoms, as well as separate cases and parts of cases of this kind, are admitted at the same rate of duty and under the same conditions as watches, cases, and parts of cases of other kinds, provided that these watches, cases, bottoms of cases and parts of cases are convex, and do not imitate the flat form of a medal.

[The words enclosed in square brackets above are omitted in the present tariff.]

	Transmission gearing, balances, scales, fixed railway stock, signals, presses, lifting apparatus, &c., apparatus not mentioned driven by mechanical force	15 00	—	—	—
	Milling machinery, cylinder mills, machines for the manufacture of alimentary pastes, lifting apparatus ...	—	10 00	—	—
	Transmission gearing, balances, scales, fixed railway stock, signals, presses, &c., apparatus not mentioned driven by mechanical force	—	10 00	—	—
	Boilers :—				
526	Steam boilers* of steel or iron plate, sectional or not, with or without feed-water heaters or internal furnaces, without tubes*	12 00	9 00	13 50	9 00
526 *bis*	Steam boilers, of steel or iron plate, tubular or semi-tubular, *i.e.*, fitted with tubes of iron, steel, copper, or brass*	18 00	14 00	18 00	14 00
526 *ter*	Steam boilers, multi-tubular, chiefly composed of iron or steel tubes, fitted or not, and parts of these boilers†	—	—	27 00	18 00
	Parts of multi-tubular boilers, chiefly composed of iron or steel tubes, fitted or not	24 00	18 00	—	—
526 *quat.*	Open boilers, gasometers, recipients of iron or steel plate‡	—	—	12 00	8 00
	Open boilers, gasometers, recipients, stoves and hot-air stoves (calorifères) *of sheet iron or steel, or of cast iron combined with sheet iron or steel*	12 00	8 00	—	—
526 *quin.*	Boilers, hot-air stoves (*calorifères*) heated by steam or hot water, hot-air stoves heated by petrol, bath-heaters with parts in copper (in a proportion not exceeding 50 per cent. of the total weight)	—	—	23 00	15 00
526 *sex.*	Radiators for hot-air stoves, chafing dishes heated by gas or petrol ...	—	—	12 00	8 00
527	Sugar machinery, heating apparatus, for breweries, distilleries, perfumeries, pharmacies, and kitchens, the copper and bronze predominating in weight,§ weighing—				
	250 kilogs. and more	30 00	20 00	30 00	20 00
	Less than 250 kilogs.	50 00	40 00	60 00	40 00

* Boiler fittings, safety valves, &c., are not separated from the boilers to which they are fitted, and are subject to the same duty. The cast iron furnace plates and bars are dutiable separately under No. 553.

† Steel tubes shaped (*emboutis*) or without solder, contained in the boilers, shall pay the rates of duty inscribed under No. 567 for tubes of that kind.

‡ The recipients admitted at the rates of duty laid down under No. 526 *quater* are those manufactured from plate of 1 mm. or more in thickness, not galvanized. Those manufactured from galvanized, enamelled, or tinned plate, or from plate of less than 1 mm. in thickness, shall pay the rates of duty inscribed under No. 568.

§ Worms of tubes shaped (*emboutis*) or without solder shall pay the duties inscribed under No. 567 for tubes of that kind.
